History of original corner establishment:

This section corner was set by deputy surveyor William H. Odell, under contract No. 120, dated May 27, 1867. He states he set a post for the section corner to sec's 14, 15, 22, 23 and drove a charred stake and a raised mound of stone as per instructions.

DIAGRAM T 1 N S 15 S 14 S 22 S 23 R 40 E 1992 ORLS 645

Description of corner evidence found:

At the assumed section corner location, I found a county road running east-west and old fence lines running North and South. Using the intersection of the County road rightof-way and the fence lines, I found a GLO topo call to a small spring branch to fit very well. There is no other evidence available at this location.

Description of monument and accessories I established to perpetuate the original location of this corner:

Using the evidence I found to be the best acceptable data available at the corner location, I then set a $2\frac{1}{2}$ in. aluminum cap in a block of concrete with two pieces of rebar reinforcing in the concrete approximately 6 in. below the surface as the area is in solid rock and it is impractical to go deeper. The cap being stamped as shown in the above diagram. With no trees available in the area, I then set four reference pins, being 5/8 in. x 12 in. iron pins, driven to refusal, with a plastic cap stamped ORLS 645.

CERTIFIED RECORD OF LAND CORNER MONUMENTATION

Corner originally established by William Odell under GLO joint contract number 120 dated May 27, 1867. Surveyor General field notes state:

HISTORY OF ORIGINAL CORNER ESTABLISHED:

Set post for corner to secs. 14,15,22,23, drove charred stake and raised stone mound as per instructions.

Corner was monumented by James Hambleton in 1992. Union County Monumentation Record 093-1992R states: At the assumed section corner location, I found a county road running East-West and old fence lines running North and South. Using this intersection I found a GLO topo call to a spring branch to fit very well. No other evidence available. I then set a 2 ½" aluminum cap in a block of concrete with two pieces of rebar reinforcing in the concrete approximately 6" below the surface as the area is in solid rock and impractical to go deeper. From which:

A 5/8 x 12 inch rebar with yellow plastic cap bears North 55°51' East, a dist. of 47.91 feet marked ORLS 645. A 5/8 x 12 inch rebar with yellow plastic cap bears South 51°57' East, a dist. of 41.95 feet marked ORLS 645. A 5/8 x 12 inch rebar with yellow plastic cap bears South 41°48' West, a dist. of 35.95 feet marked ORLS 645. A 5/8 x 12 inch rebar with yellow plastic cap bears North 52°50' West, a dist. of 43.05 feet marked ORLS 645.

DESCRIPTION OF CORNER EVIDENCE FOUND:

A 16" x 12" rounded mound of concrete, 2" below the road surface, with South West corner broken away and missing. A round impression exists in the Eastern edge of the center where the aluminum cap once set. From which:

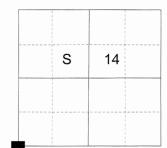

A 5/8 inch rebar with yellow plastic cap bears North 56° East, a dist. of 47.91 feet marked ORLS 645. A 5/8 inch rebar with yellow plastic cap bears South 52° East, a dist. of 41.95 feet marked ORLS 645. A 5/8 inch rebar with yellow plastic cap bears South 42° West, a dist. of 35.95 feet marked ORLS 645. A 5/8 inch rebar with yellow plastic cap bears North 53° West, a dist. of 43.05 feet marked ORLS 645.

DESCRIPTION OF MONUMENT AND ACCESSORIES I ESTABLISHED TO PERPETUATE THE ORIGINAL LOCATION OF THIS CORNER:

From the found references at record distance I set a $5/8" \ge 6"$ rebar, drilled 4" into concrete and bedrock, 2" below ground, with 2 $\frac{1}{2}"$ aluminum cap marked as shown below and set in new concrete.

REGISTERED PROFESSIONAL	I hereby certify that the corner was perpetuated on January 25, 2019.
