

CERTIFIED RECORD OF LAND CORNER MONUMENTATION

History of original corner establishment:

Original survey by David P. Thompson, Contract No. 103, 1863;

Set post for corner to Sections 3, 4, 9 and 10 in mound of earth with charred stake, Pits, trenches as per instructions.

Description of corner evidence found:

Refer to Union County Survey No. 13-86.

Upon an extensive survey in T.2S and T.3S, R.40E, and review and records evaluation of existing County Road and other surveys, it was determined that the best available evidence of the original corner position is the location of the existing road and lines of occupation (fences). Therefore, we establish the corner point at the center of the fenced right-of-way of Union County Road No. 63 (Warm Creek Road) and at the intersection of prominent fences running East and West.

Description of monument and accessories established to perpetuate the original location of this corner:

At the corner point established as described herein and on Union County Survey No. 13-86, we set a brass disk in concrete buried 12" below the roadway surface and accessible through a cast-iron "Water Valve" cover, marked:

Placed "U.S. Forest Service Location Poster" on metal fencepost 32 ft. West of corner position.

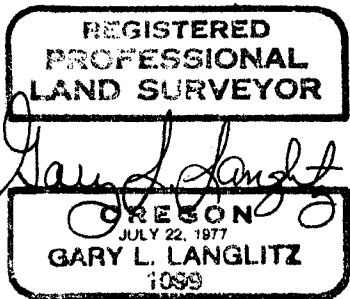

No accessories available.

April 23, 1986

DIRECTIONS "TO REACH"

From Cove High School, travel North on Highway 237 1.10 miles and you will find that the highway makes a big left turn. Don't turn left, take the road that continues North. This is Lower Cove Road. From this intersection, travel about .75 miles North. There is a gravel driveway taking off to the right and several mailboxes. There is a power pole on both sides of the road. You will find the corner in a water valve box in the middle of the road.
